

Savant® Smart Audio WiSA™ (Wireless Speakers & Audio) Setup Guide

Document Number: 009-1903-03
Document Date: February 2021
Document Supports: da Vinci 9.2 or higher

CERTIFIED

This document will guide the user through the process of configuring Savant Smart Audio WiSA products. All of the WiSA speaker setup is completed within the Savant Pro App. This guide assumes that all initial Savant system configuration has been completed, the system has been deployed, and the Savant Pro App is connected to the Host via an Admin User account. Products supported by this document include:

- Smart Audio WiSA Soundbar 55 [HST-STUDIO55WS-SUR]
- Smart Audio WiSA Sub [SPK-S1WSx]
- Smart Audio WiSA Surround Speakers [SPK-SUR3WSx]
- Smart Audio WiSA Bridge (Stereo) [PAV-AOMWS1C]

1. Before You Begin

Read this document in its entirety before starting the WiSA setup, and ensure that the following required items are available:

- Savant system is deployed
- Savant WiSA Transmitting Device is deployed.....
- WiSA Speakers are placed within 40 feet from WiSA Transmitting Device and are powered on.....
- Note:** Ensure other WiFi Transmitting Devices are a minimum of 6 feet from any Savant WiSA device.
- Savant Pro App installed and updated to release 9.2 or higher

Gestures

This guide will instruct a user to tap, press and hold, and swipe across the screen of a smartphone or tablet.

	Tap	Press and release (tap) a button or icon.
	Press and Hold	Press and hold a button or icon on the screen until a pop-up menu or other feature appears.
	Swipe Left or Right	Press and swipe finger to the left or right.
	Swipe Up or Down	Press and swipe finger up or down.

Volume Control

Volume control of the WiSA network is done within any of the Savant User Interfaces (UI). The entire WiSA network is controlled with the active Audio/Video service.

2. App Setup

This guide assumes that the Savant System has been deployed and all external speakers and subwoofers are powered on. This section describes the initial setup of a WiSA network. It also can be used to add or remove speakers, or check the status of speakers within the WiSA network.

 **TIP!** In deployments where more than one WiSA system will be configured (multiple rooms with WiSA speakers), Savant recommends configuring one room at a time, with any un-configured rooms' speakers powered off during configuration to limit the number of options displayed in the Pro App setup flow.

1. From the **Home** screen, swipe right to enter the **Settings** screen.
2. Tap **Audio Settings**.
3. Tap **Wireless Speaker Setup**.
4. Tap the Room to be set up.
5. Tap **Wireless Speaker Setup**. This starts the WiSA discovery process for the selected device.

 **HELPFUL INFO:** After setup has been completed for a room and a configuration has been saved, the above image for step 5 will display with an extra button. This button displays with the text **View Current Speaker Group**, this allows the user to check the status of the configured speakers and displays the number of speakers saved in the configuration.

- When discovery is complete, the app will present results in the form of speakers that have been discovered during the scanning process. Swipe right or left through the list to see the discovered speakers. The image below shows an example of speaker cards displayed within the app.

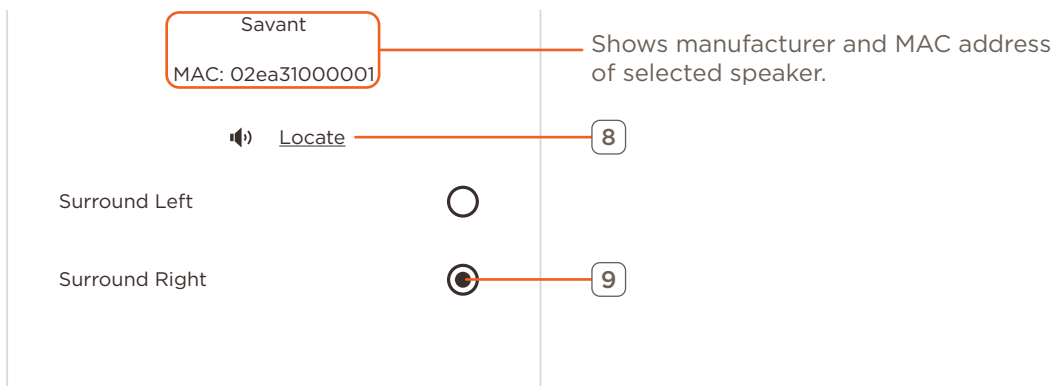

- Select a speaker/subwoofer to bind.

TIP! The speaker cards displayed within the app show the MAC address of each speaker. The MAC is also printed on the physical label on each speaker and can be used to confirm the speaker being bound.

- Tap the **Locate** button. This will play pink noise through the speaker for two seconds. While playing the pink noise the **Locate** button will display as **Sound is Playing**

- Locate the speaker that plays the pink noise and assign its location within the room's speaker configuration.
- Repeat steps 6 through 9 for each speaker to be added to the system. Speakers that are not assigned a location will be removed for the WiSA Network.
- Once all speakers have been added, tap **Save** to complete setup and start the WiSA network.

IMPORTANT INFO! To remove or change a speaker from a configuration, follow the same process used to add speakers as shown above, de-selecting the speaker location will remove it from the configuration once saved.

Appendix A: Icon Definitions

When navigating Wireless Speaker Setup or Viewing Current Speaker Group screens, the speaker cards displayed in the App may show one of the following icons. Their position on the card is shown in the example image below the table.

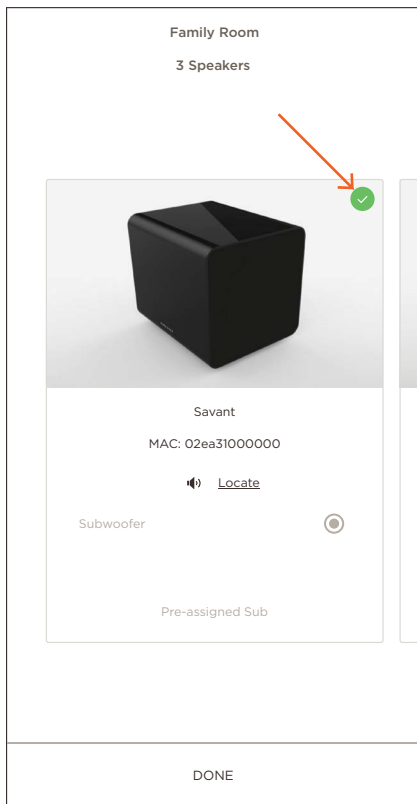

Saved and Connected

The selected speaker is saved to this WiSA system and is connected.

Saved but Disconnected

The selected speaker is saved to this WiSA system but is disconnected.

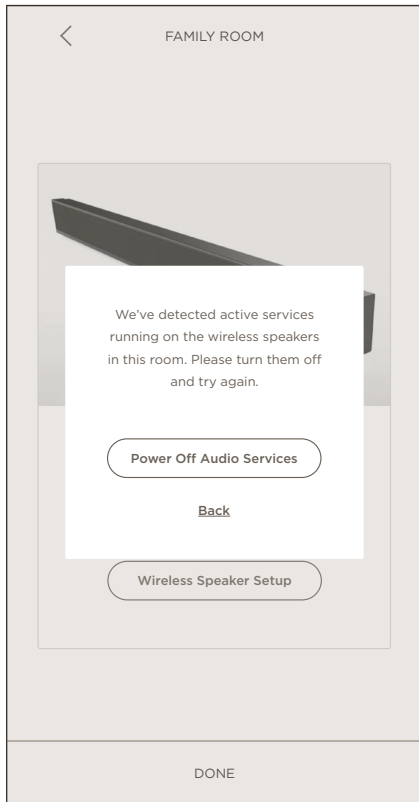

Appendix B: Splash Screens

This Appendix details some of the splash screens that may appear during the Savant Pro App WiSA setup process to warn the user of potential problems.

Active Service

This screen will be displayed if the user is attempting to start WiSA setup in a room with a currently active audio service.

No Speakers Found

This screen will be displayed if the initial Discovery process fails to locate any speakers on the network.

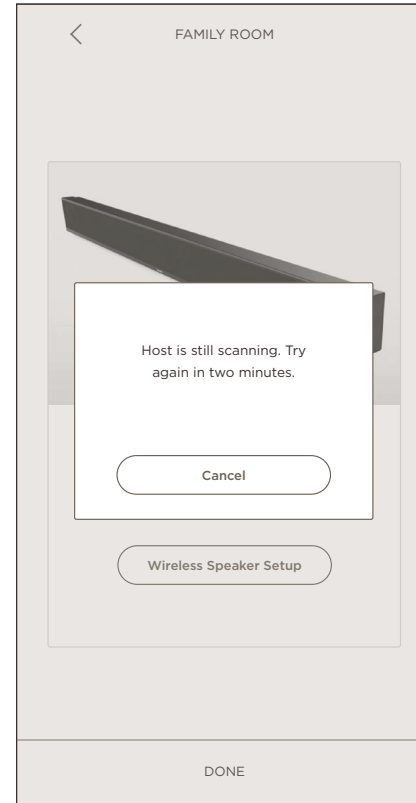

Pairing Time Out

This screen will appear if the app is left idle for 2 minutes or more after discovery has occurred but before the system is saved.

Host Scanning

This screen is displayed when the user attempts to re-enter WiSA wireless speaker setup while the device is still in a discovery state.
